Far-infrared Body Sculpting Experts

User Manual

- Many thanks for your purchase;
- Please read the operating instructions carefully before use, and after reading, please take good care of it for view any time in future;
- The beauty instrument is based on the premise of healthy skin care and designed for beauty, and prohibited from the use and sales for treatment.

Introduction and function

Body sculpting experts, using a unique design detachable three temperature zones, can be slim on the upper body, lower body and waist according to the needs of different users. Three-zone independent temperature control and protection devices, while using enhanced waterproof design. Three-zone melting fat blanket use the principle of electrical energy changing into heat energy, so that the human body feels the thermal effect from the point to the surface, from inside to outside, played a role of accelerating blood circulation, increasing oxygen and stimulating normal cell activity, enhanced metabolism , thus contributing to the body of excess water, fat and toxins to achieve slimming effect, with appropriate skin care products can achieve whitening, increase flexibility, gloss, delicate skin, such as improving the quality of results, both relieve muscle aches fatigue, health promotion function.

1. Beauty - promote blood circulation, accelerate metabolism, increase muscle nutrients, can also activate cells, and discharge heavy metal ions and toxins.

2. Slimming and weight loss - can speed up the metabolism, thus promoting rapid decomposition of fat cells; quickly slimming trilogy: loose fat, burn fat fast, release fat to achieve weight loss, slimming optimal effects.

3. Body sculpting - with proper skin care products can achieve whitening, make skin quickly absorbs the nutritional essence , make the nutrients product easier to penetrate into the inner layer of skin, increase flexibility, gloss, delicate and then improve the quality of skin, whitening effect best played efficacy of the product.

4. Health care - can improve insomnia, constipation, endocrine disorders, arthritis and other diseases, relieve muscle aches fatigue, improve human immunity.

Characterisitics:

Far infrared fiber imported refined, microcomputer, digital temperature display, adjustable temperature, to solve the state of difficult control of the temperature of similar products . According to various parts of the body fat thickness divided into three different thermostats, give full play to the effect of dissolving fat.

Fat melting： Infrared radiation acts directly on the adipose tissue, fat cells were dissolved and liquefaction, which is the phenomenon of significantly reduced number of fat cells.

Fat reducing: Infrared release large amounts of energy, accelerate blood and lymph circulation,improve metabolism, speed up biochemical reactions,

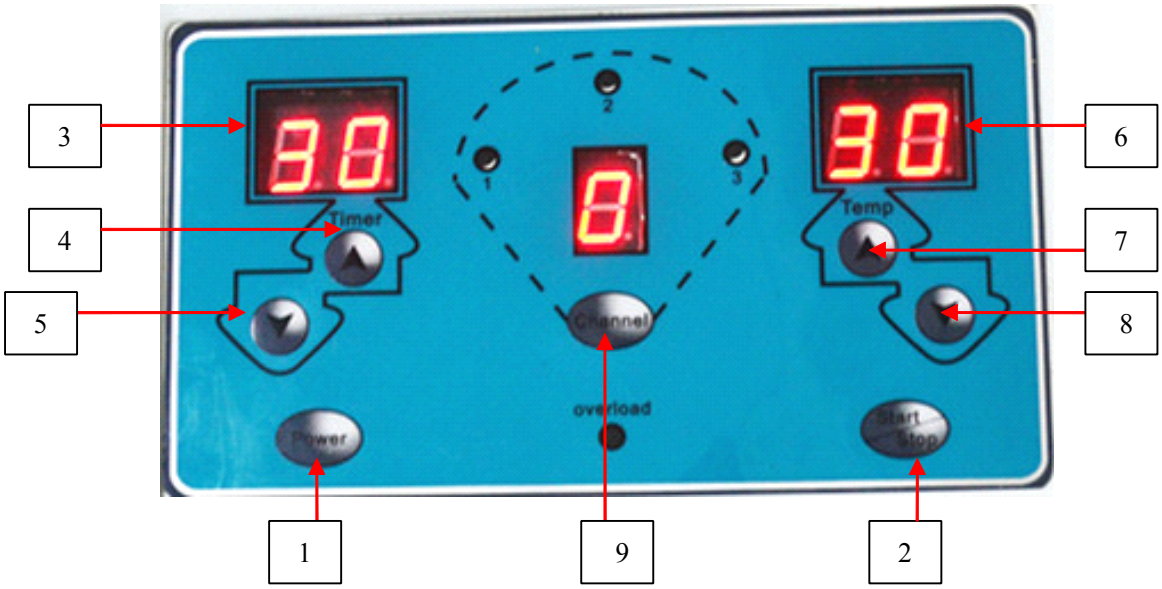
consume large amounts of AIP (adenosine triphosphate), causing the fat C catabolism.

Fat volume reducing：Increasing local tissue temperature thermal radiation, pores expand, sweat largely excreted outer, periphery of water (water in the fat) into the blood, thus greatly reducing the size of fat cells.

Lymphatic detoxification：Heat makes telangiectasia, blood flow acceleration, metabolite of fat droplets and dissolution fragmentation fatinto the blood; promote lymph circulation, eliminate toxins.

Relieve muscle spasm: Infrared thermal effects reduce skeletal muscle tension, relieve muscle tension and spasms.

Panel scheme:



1. Power switch (POWER) 2. Stop\Start button 3. Time display

4. Time increasing 5. Time decreasing 6.Temperture display

7. Temperture increasing 8. Temperture decreasing 9.Body mode selection

Function description

1）Power switch（power）：Main power switch of control panel.

2）Stop\Start button（start/stop）：Stop\Start the instrument.

3）Time display (timer)：Display instrument's working time by set, you can adjust the time according to the user's needs, the system default time is 30 minutes.

4）Time increasing：Each click will increase the time to one minute, adjustable from 0 to 60 minutes.

5）Time decreasing：Each click will decrease the time to one minute.

6）Temperture display （temp）: Display equipment operating temperature, the temperature can be adjusted according to the user, the system default temperature is 30 degrees

7） Temperture increasing: Each click will increase the temperature to 5 degrees, adjustable from 30 to 75 degrees.

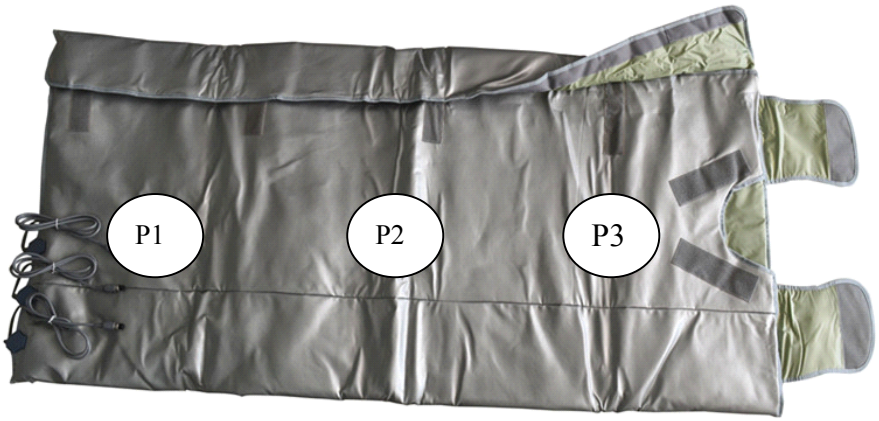
8） Temperture decreasing: Each click will decrease the temperature to 5 degrees.

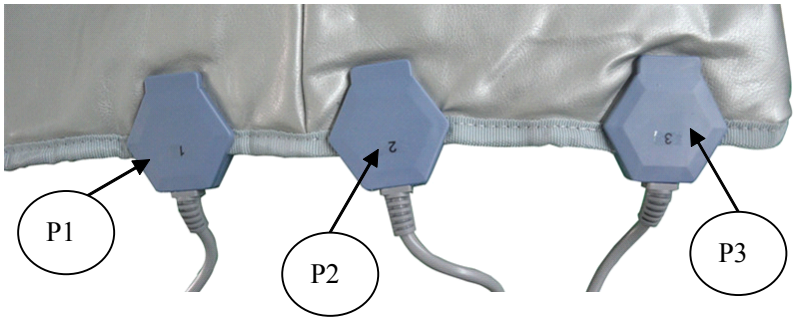
9） Body mode selection （channel）: Choose body three segments workspace.

Single Mode Selection: Click the “channel" to choose P1 workspace, double-click to choose select P2 workspace, click three times to select the P3 workspace, while on the selected mode indicator lights. After selecting, press Start / stop button to start running.

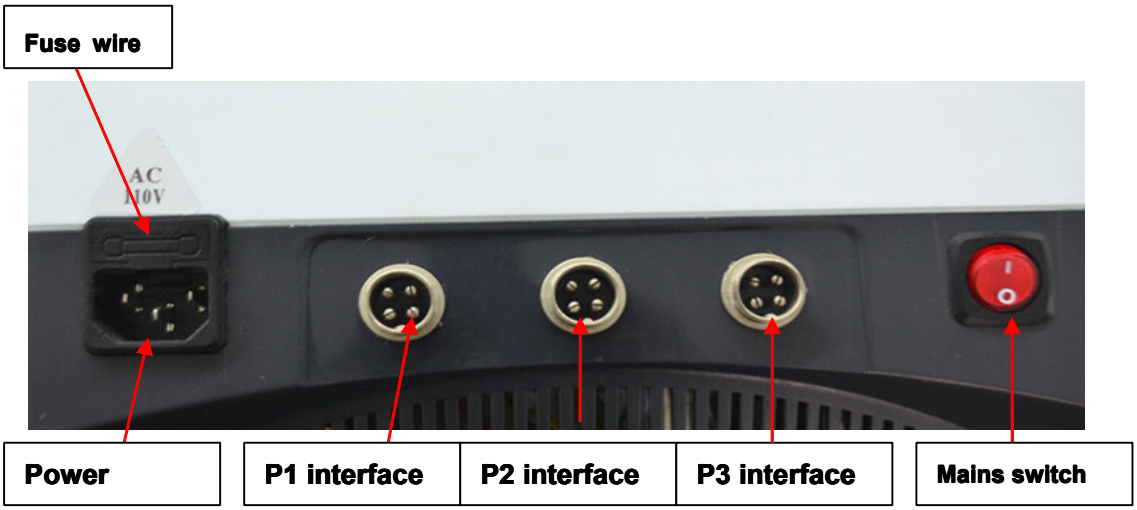
Multiselect Mode Selection: Click the “channel" to choose P1 workspace, then press “Start/Stop”; press again “channel" to choose P1 workspace, then press “Start/Stop”, so that two workspaces consecutive working; you can also choose three sections simultaneously to heat , as described above for re-election three modes to start.

P1 workspace: Lower body work area, mainly for leg heating work performed;
P2 workspace: Abdomen work area, mainly for abdomen heating work performed;
P3 workspace: Upper body work area, mainly for the shoulder and chest area heating work performed;





Back scheme:



Operating instructions

The heating blanket cable is connected to the host according to the correct instructions, plug in the power, press the power switch behind the instrument, the instrument enters the standby state, press the power switch

on the instrument panel, the instruments get into operation, the default time is 30 (the maximum time 60 minutes can be adjusted freely, generally recommended to use the default time of 30 minutes); select the equipment operating temperature user required, the system default temperature is 30 degrees, you can choose according to different groups of people, the recommended temperature setting range within 30 ~ 65 ℃; select the body region which need to heat, press the

button on the front panel, press

to start working, press the Start/ Stop again to stop running.

Features

1. Body sculpting, weight loss, decomposition, eliminate stubborn fat.
2. Heat and detoxification, eliminate fatigue, relieve stress and muscle pain
3. Promote blood circulation, improve metabolism.
4. Improve the lymphatic system, improve the loose skin tissue.

Application:

Applies to: Body weight, body sculpting, body detoxification, body build, weight loss and detox, whole body slimming; clear the blood meridian, resolve body fat; physical therapy, detoxification, slimming; promote metabolism, enhance cell regeneration; enhance the vitality and improve physical fitness; remove fatigue and excess moisture, fat reduction.

Precautions

1. Check well and connect the power cord.
2. Treatment site skin feeling disorder, should appropriate to reduce the temperature to avoid burns. After grafting, fresh scar, due to poor heat dissipation, while reducing treatment temperature should reduce the temperature.
3. Parts of a serious blood circulation obstacle, blood vessels or capillaries dilated parts, post-traumatic bleeding tendency site should not be used.,
4. During use, beauticians need to closely observe customer reactions, feel free to ask the customer feel, in order to avoid overheating, causing burns.
5. Children, sick people use, should be required family care.
6. Avoid using within half an hour before or after meals
7. People leave or when not in use, should pull the plug, cut off the power
8. Do not use near a furnace or a hot place.
9. Placed in dry place, avoid moisture and sunlight

Technical parameters

Voltage：110V/120V-220V/240V

Frequency: 50 Hz - 60Hz

Power: ≤300W

Safe voltage output: 36V

Heat output：30℃-65℃

Material:ABS

Packing size: CM

GW/NW：12 KG/9.8KG

Parts list

1. Host	1
2. Power line	1

3. Heat blanket	1（3 connecting lines）
4. Instruction	1

Product service and repair

1. This machine from the date of purchase (with a note) host a year warranty. Quality problems within one year have free repair, such as the problems after one year will receive maintenance costs. Parts' warranty for six months; in six months appear quality problem have free repair by free of charge; after six months charge parts maintenance costs. Other has been guarantee deadline, can

be responsible for maintenance, but charge spare parts and consumables cost fee. If need supplement or purchase, please contact our company.
2. Causes the following use of personal failure, does not provide free warranty service.
1) The unauthorized entry, modification caused the failure of the product;
2) Use accidentally blows, falls caused by the fault;
3) Lack of reasonable maintenance caused the failure;
4) Did not at the correct guidance of instructions caused by the fault.
